

# FUTURE LIFE DESIGN

*Scientific Methods for  
Improving Future Lives*

## Quality Reincarnation

Have you ever wondered about what comes next?

Ancient wisdom teaches that unless you are on the verge of enlightenment, you will probably be facing reincarnation when your current life ends. If your body is over 60, that time is approaching.

You are not alone. In the next century, over 7 billion human beings will reincarnate. However, the vast majority of these people will be inadequately prepared, lacking the education, skills and vision to improve themselves.

Ineffective reincarnation limits the advancement a person can make from one life to the next. The aggregate effect of this across the race impedes humanity's progress towards a brighter future.

Quality reincarnation is one of the greatest challenges facing humanity today, and it affects everyone on the planet, including you, your loved ones, and everyone you know.

A new subject called *future life design* addresses these issues.

## Designing Future Lives

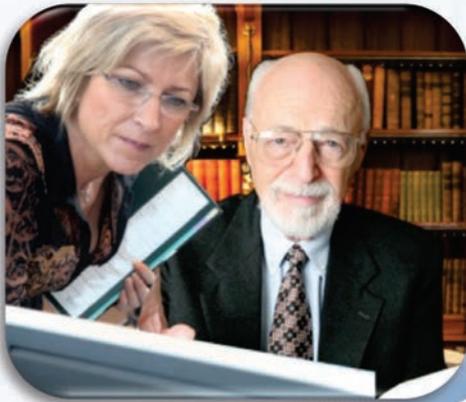

Entirely new kinds of future lives can be opened up through the scientific application of four revolutionary new breakthroughs in modern astronomy, psychology, neurology and physics.

Startling new information has come to light in these four fields which fundamentally alters our understanding of reincarnation. These findings have been combined to create a groundbreaking new methodology for enhancing future lives.

Future life education is a dynamic game-changer in reincarnation, and it can make the subject more understandable, and more manageable, to people from all walks of life. Better education can open up enormous new freedom in choosing future lives, and empower people to uplift themselves into brighter tomorrows.

# Why Are Future Lives Important?

Why should anyone care about future lives? Most people have more pressing immediate concerns in their current lives.

The answer has two parts. The first part concerns our *stage in life*. While young people are rightly focused on the present, it may be wise for their elders to start thinking about what comes next.

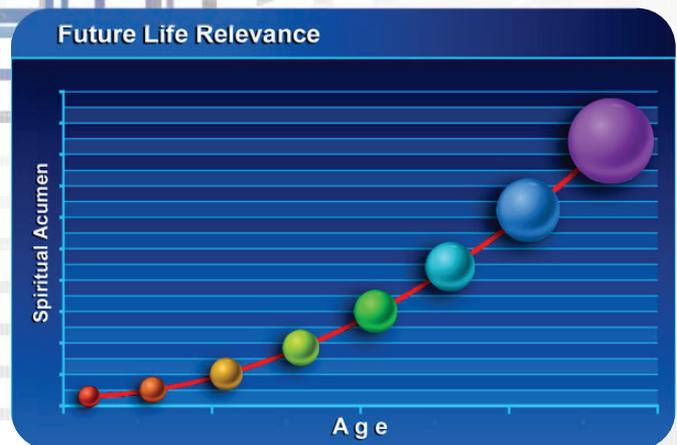

The second part has to do with our *concept of identity*. Future lives really only matter to us when we have a firm grip on our spiritual identity.

The person who habitually thinks of themselves as a body with a personality has no motivation for exploring other lifetimes.

## Relevance

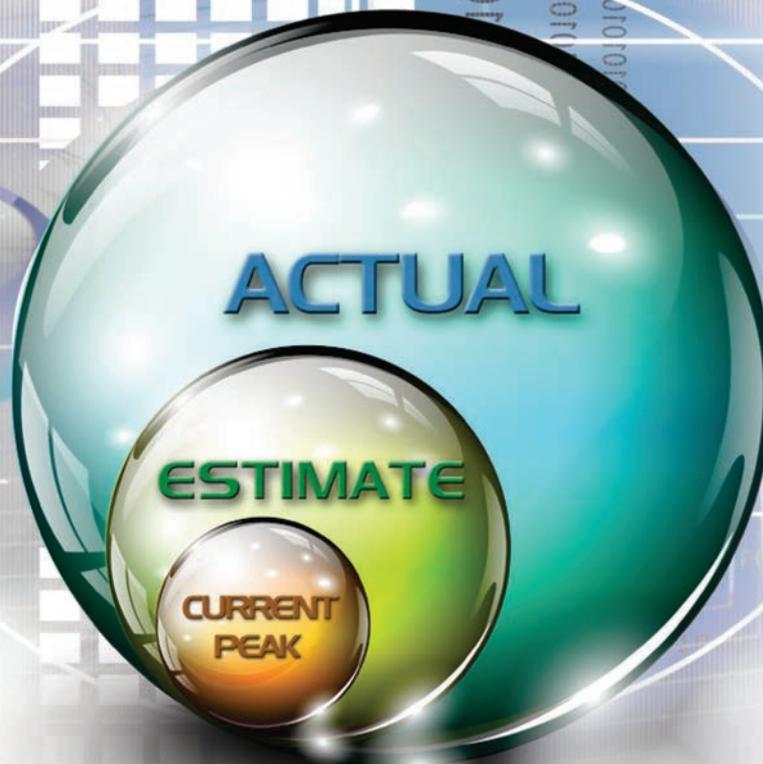

Future lives grow in importance as we acquire greater spiritual insight, and as our bodies age. They are the most interesting to older and wiser people, although mature souls of any age can be drawn to the subject.

# Awareness Potential

The ability to capitalize on future lives hinges on our awareness level.

Each of us is inherently capable of higher states of being. In fact, a spiritual being's awareness potential is considerably greater than most people imagine.

A peak experience in someone's current life might bring them to an awareness level 5 times greater than their normal state of consciousness.

From this perspective, they might estimate their full potential to be 10 to 15 times greater than their average level of awareness.

In reality, our actual capacity for beingness is over 100 times greater than our usual level of consciousness.

We know that awareness is scalable; the age-old question is how to make it sustainable. The book *Future Life Design* presents a radical new set of strategies for achieving permanent gains.

# Dynamic Game-Changers

## Exciting New Discoveries

The book *Future Life Design* introduces a new cognitive science for enhancing a person's reincarnation skills and improving their upcoming lives. Higher quality future lives can eradicate suffering and expand joy.

## Gateway For Change

The work multiplies a person's freedom and range of choices, opening a gateway to better future lives, and also a channel for positive change today.

## Landmark Achievement

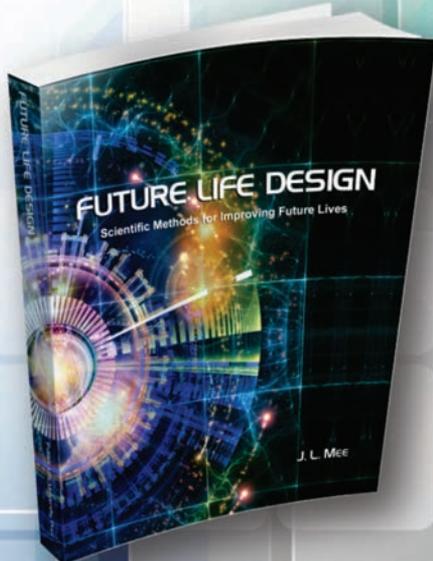

*Future Life Design* is the first scientific treatment of future lives ever published. It is a landmark in the progress of spiritual science in the West.

## Global Audience

This subject is of interest to progressive individuals in a global audience of one billion people who accept reincarnation. Its widespread application can accelerate humanity's conscious evolution to premium-quality future lives.

## New Future Lives

*Future Life Design* introduces groundbreaking scientific discoveries which open up dynamic new freedoms in choosing future lives.

# Transformational Results

The advantages of upgrading an entire forthcoming lifetime are so gargantuan they tend to overshadow the benefits that accrue in the current life. Nevertheless, future life work places a person squarely in their spiritual identity, which can deliver a wealth of immediate dividends, such as:

## Sense of identity beyond current life

- Trust and confidence in the future
- Open to exciting new possibilities

## Greater sovereignty

- Expanded perspective on life and greater freedom of choice
- Enhanced capacity for self-empowerment and understanding

## Inner peace and tranquility

- Mindful living in the present moment
- Initiate and engage in positive thoughts and behaviors
- Freedom from worry and fear

## Accelerated spiritual development

- Heightened awareness and intuition
- Greater understanding of the mysteries of life and the universe

## Flexibility and openness to change

- Facilitate lasting paradigm shifts
- Release limitations to a more authentic self
- Make smarter choices and wiser decisions

## Increased love and acceptance

- Create deeper and more rewarding relationships
- Greater tolerance, understanding and compassion

# Central Points

Future life design has six central points, which are illustrated below and explained on the facing page.

### Conscious Creation

Human beings can accelerate our conscious evolution through the *deliberate design* of future lives.

### Intelligent Decisions

We can make *intelligent decisions* in our selections for upcoming lifetimes by educating ourselves in the wide range of options that are actually available.

### Trans-Life Psychology

A new cognitive science called *trans-life psychology* enables human beings to consciously create our future lives.

### Freedom of Choice

There is a much *broader array of choices* for our future lives than previously imagined.

### Trans-Life Memory

Trans-life psychology is anchored in a new *trans-life memory science*, which provides a scientific basis for the conscious creation of future lives.

### Spiritual Chemistry

Trans-life memory science is supported by a new *spiritual chemistry*, whose axioms and formulas reveal fundamental laws governing spirit and the physical universe.

# Methodology

Future life mentors are trained in trans-life psychology techniques to help students design brighter future lives. Mentors help students cultivate mental conditioning, programming, and practices for improving the quality of their upcoming lifetime.

## Foundation

- Students are prepared for dynamic change by examining 14 core areas to ensure they have a solid foundation for future life work. Key areas such as beliefs, emotions and attitudes are reviewed to identify and resolve any conscious or hidden blocks to progress.

## Blueprint

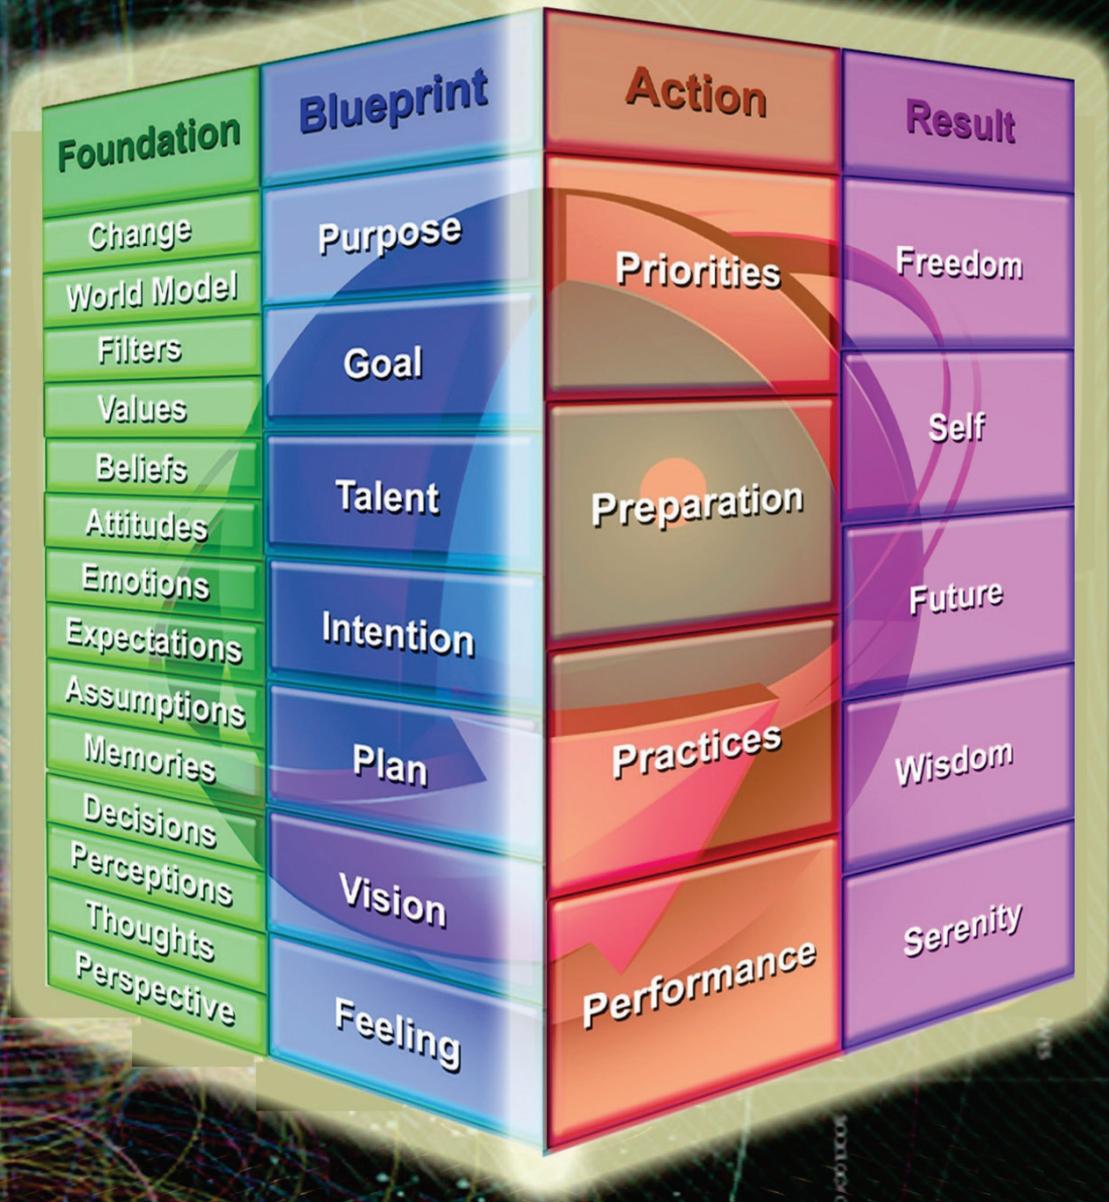

- Students develop a blueprint for their future lives including their purpose, goal, intention and vision. The blueprint serves as the basis for creative visualization.

## Action

- Students re-examine their priorities and develop future-focused practices to prepare themselves for effective interlife performance.

## Result

- The program exponentially multiplies the student's freedom and choices for future lives, builds a robust future self, and provides a foundation for lasting changes today.

# TRANS-LIFE PSYCHOLOGY

# Conclusions

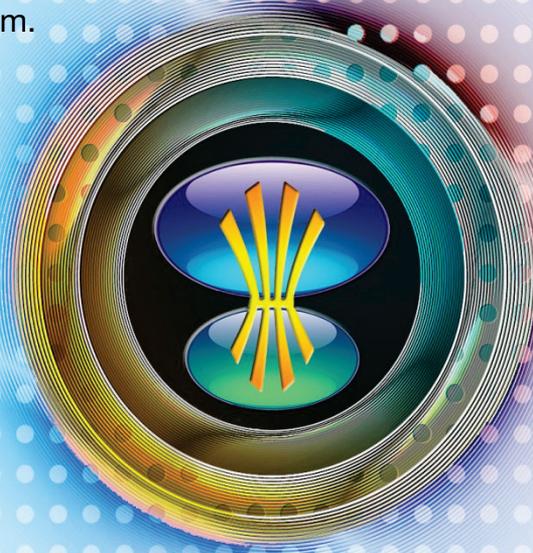

For more than one billion people alive on the planet today, reincarnation is an accepted fact. Yet even among those who believe in the continuity of life, there is often little or no thought given to the quality of the next lifetime (let alone a conscious creation of it). This is commonly due to the tendency to over-identify with the incarnation and focus on the current life's day-to-day concerns rather than on the eternal self.

Future Life Design is a breakthrough program which addresses these issues. Drawing upon new discoveries in modern astronomy, psychology, neurology and physics, it presents a fresh, 21st Century approach to reincarnation while honoring ancient wisdom.

The concept of "life by design" is a powerful formula for success which has generated a myriad of benefits for individuals and society today. Its application to future lives is a paradigm shift in cognitive psychology and a game-changer in reincarnation.

Future Life Institute delivers future life mentoring and education which supplies our students with innovative methods, tools and techniques for upgrading the quality of their forthcoming lives. The syllabus also addresses the student's current life experience to provide a solid foundation for future life work.
